WATERMASTER™
The #1 Floating, Self Priming Pump
#1 in the field

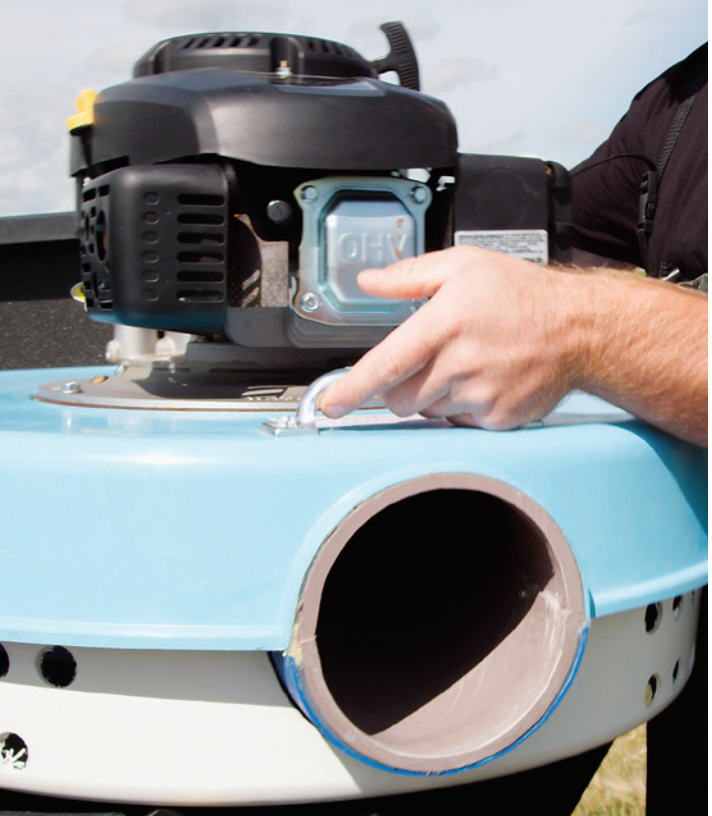
Get a Watermaster Floating Pump …and Get Back to Work!

50 years after its invention, the Watermaster Floating Pump is still the lightest and fastest pump on the market. It's #1 in the field.

And it's still manufactured in Saskatchewan, Canada, built by hand from the most durable components.

Watermaster Floating Pump has become a truly international product, making life easier for folks all around the world.



Make sure you get the genuine Watermaster Floating Pump. It's the best choice for all kinds of reasons:

Self-priming: Pumps without delay.

Portable: Take it wherever you need it.

Lightweight: DRY WEIGHT 37.5 kilograms (83 pounds).

Easy-to-use: Simply set it on the water you want to pump off.

Fast, fast, fast: Pumps at 3,183 litres (700 imperial gallons) (841 US gallons) per minute with a five-foot lift – up to 190,936 litres (42,000 imperial gallons) (50,440 US gallons) per hour. Fill a 13,638 litres (3,000 imperial gallons) (3,603 US gallons) water tank in less than 5 minutes!

Powerful: Pumps up to a 30-foot (9.14 metres) incline.

Self-contained: No need for electricity or auxiliary tractor power.

Adaptable: Large inlets and specially designed impeller allow the pump to easily handle almost any liquid – from water to sludge.

Efficient: Built with a 5.5 horsepower, heavy-duty industrial gas motor.

Warrantied: Buy Watermaster through our authorized dealers, and not only is it warrantied, but your dealer manages any repairs or parts that may be required.

ROI: By increasing productivity, Watermaster pays for itself quickly – a great return on investment.
